Subject: News Update: EPA Moves Science Advisor Glenn Paulson To New Position In ORD (Inside EPA)

Risk Policy Report - 05/06/2014

EPA Moves Science Advisor Glenn Paulson To New Position In ORD

Posted: May 5, 2014

EPA is moving its science advisor, Glenn Paulson, from a slot advising the agency's administrator to a new position as senior advisor to the assistant administrator for the Office of Research and Development (ORD).

In the meantime, Bob Kavlock, a top ORD science official, will temporarily assume the role of the agency's science advisor, Deputy Administrator Bob Perciasepe said in an April 29 all hands email. *The email is available on InsideEPA.com. (Doc. ID: 2469167)*

"Dr. Paulson will provide expert advice on the nexus between science and policy, helping to ensure that EPA's decisions and policies are informed by sound science and that ORD's research programs address the Agency's highest priorities," Perciasepe said.

One agency source says that once Thomas Burke is confirmed by the Senate as EPA's next ORD chief, he will assume the dual roles of science advisor and ORD chief. Should that occur as planned, it will return the agency to its prior practice of having a single person fill both roles, though both the National Academy of Sciences (NAS) and Government Accountability Office have urged EPA to keep the two positions separate to better advance and manage EPA science.

Former Administrator Lisa Jackson brought Paulson, a former colleague at the New Jersey Department of Environmental Protection, to EPA in the spring of 2012. In his position at the agency he led a small office that manages a number of important agency functions, including overseeing the agency's scientific integrity efforts and human research ethics, chairing the Science Technology and Policy Council, and managing a number of agency-wide technical groups, including the Risk Assessment Forum (RAF), the Council for Regulatory Environmental Modeling and the Forum on Environmental Measurements.

He has also worked on some high-profile projects, including EPA's assessment of the impacts of the proposed Pebble Mine in Alaska's Bristol Bay, which the agency is now citing to justify its likely pre-emptive veto of the proposed mine. He has also been involved in EPA's ongoing study on the risks to water quality posed by hydraulic fracturing.

Additionally, Paulson has worked on several other major projects, including revising EPA's Integrated Risk Information System program and overhauling the agency's laboratories.

But Paulson has also been criticized by several agency and external sources for limited output of the agency's RAF, which he oversaw. The group is a key source of risk policy guidance for the agency, but released no reports in 2013, the first time in 23 years.

Paulson's appointment as science advisor represented a break in agency practice. Until Paulson's appointment, the agency's politically appointed ORD head had also served as the agency's science advisor.

Former Assistant Administrator Paul Anastas, who left the agency in February 2012 to return to his academic post at Yale University, was the most recent example.

But the agency now appears to be returning the science advisor role to the ORD chief.

Perciasepe says that Kavlock "will step in as the interim Science Advisor." Kavlock, who joined the agency in 1977, is perhaps best known for forming the agency's National Center for Computational Toxicology before joining ORD leadership. Perciasepe calls Kavlock "highly qualified and a natural choice for this interim assignment as the Agency Science Advisor," adding that he appreciates Kavlock's "willingness to take on the additional responsibility . . ."
